

# TELEX BIRD WIRE

[www.birdcontrol.cn](http://www.birdcontrol.cn)

## General Descriptions of TELEX Bird Wire

1. Bird Wire is a economical, versatile and humane bird deterrent system.
2. Bird Wires are held by stainless rod with different post pad. Many other hardwares and fittings have been developed to enable this system to be used in different situations.
3. Telex Bird Wire is not suitable in infested places where the birds are roosting at night or nesting.

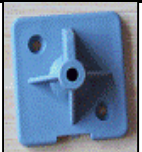

### Wire

The bird wires are made from stainless wire with nylon coated. UV stabilised. diameter 0.45mm (1X7) and coated to 0.76mm. 450meters/per roll. 7x7 bird wire without coating (diameter 1.7-2mm) is also available.

### Rod

The rods are made from stainless wire, diameter about 4mm. The length can be 9cm, 11cm, 13cm, 15cm, 18cm or as requested with single or double holes.

### Plastic Pad

The post pad is made from heavy PVC with different colors.

### Springs

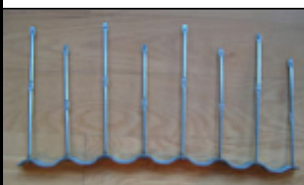

The springs are made from stainless wire.

### Crimps

The bird wire crimps are made from Nickel plated copper.

## Other Bird Wire fittings and hardwares

**Multi Post**

**Beam Clamp**

**Gutter Posts**

Telex can produce metal or plastic hardwares and fittings as the user's design or samples.
